DEMOGRAPHY.

For a brief summary of the results for Tasmania of the Census of 1921 see Tasmanian Pocket Year Book; for fuller information see Tasmanian Statistics, 1921-22, and Census Bulletin, No. 17; for complete details see the Census Reports of the Commonwealth Bureau of Census and Statistics.

For estimate of mean population of Municipalities in 1932 see page 19.

Reference may be made to the Commonwealth Annual Bulletin of Demography for fuller information for Tasmania in respect to:—

Ages, birthplaces, and occupations of parents of children born.
Birthplaces and occupations of persons who died.
Ages, birthplaces, occupations, and conjugal condition of persons who married.

Also for detailed information for the Commonwealth as a whole, but not for Tasmania separately, in respect to:—

Mother's age, showing duration of marriage and previous issue.
Interval between marriage and first birth.
Causes of death classified according to occupations.
Duration of marriage, total issue, and average family for persons who died.

THE MEASUREMENT OF POPULATION.

The population of Australia has been counted systematically every 10 years since 1881, but owing to financial stringency the census which ordinarily would have been taken in 1931 has been postponed to 30th June, 1933. The last census was made on the 4th April, 1921.

At the census, the numbering is carried down to the smallest divisions, and full information as to age, occupation, nationality, &c., is collected. Between censuses the only official counting is for whole States, and information as to age, &c., is necessarily incomplete. The inter-censal estimates are made by keeping count of the births and deaths in each State, and of arrivals and departures to and from each State. These estimates are made by the Commonwealth Statistician for the last day of every quarter.

There are, no doubt, errors in the census, but they may be taken as negligible. This is not the case with the inter-censal estimates. The counting of births and deaths is very accurate, but it has been found impossible to get an exact record of migration. Movement across land frontiers of States presents obvious difficulties in counting, but experience has shown that the estimates of Tasmanian population are even more liable to error than in the case of mainland States. There is, in general, a considerable number of unrecorded departures, so that any State which is losing population by migration tends to have its population overestimated.

When a census is made, the error in the previous estimates is shown. For the next intercensal period it is assumed that the previous error is going on, and a correction is made to the quarterly estimate by making an allowance, where necessary, for unrecorded departures based on the experience of the preceding intercensal period. For Tasmania this amounts to an addition quarterly of 65 males and 25 females to the recorded interstate departures, and of 1 per cent. to male recorded departures oversea, and 4½ per cent. to the female recorded departures oversea.

From the persistent efforts made to obtain greater accuracy in migration records, it might be expected that this allowance would be more than would be required at present. On the other hand, the unprecedented drain on Tasmanian population during the recent years might be expected to require a still larger allowance. On the whole it is probable that the official estimates are very close to the actual facts, with a slight presumption that the population of Tasmania is being, to a very small degree, overestimated.

For any division smaller than States it is impossible to give any trustworthy estimate between censuses. Where growth has been, on a general impression, steady since 1911, a fair estimate may be made, based on past experience and the last quarterly estimate for the whole State. But war broke all continuity in the last decade, and the later abnormal migration from Tasmania makes any such calculation of little value for any town, municipality, or other division of this State. Under these circumstances, the best source of information is the electoral roll, and the number of electors enrolled, combined with the quarterly estimates for the State, offers a basis for rough estimates of intercensal populations of parts of this State. This is the basis of all such estimates printed in the following pages.

STATISTICAL SUMMARY for TASMANIA, from 1836 to 1932 inclusive.

(*a*) Moonah, Derwent Park, and suburban to Humphreys' Rivulet. (*b*) City boundary to Brown's River. (*c*) Humphreys' Rivulet to Granton on main road. (*d*) Collinsvale, Collins Cap, Glenlusk, &c. (*e*) Hobart City boundaries—except that area outside Corby-Ave., Glen, Wentworth, & Reform sts., Proctor's Rd., and Lord-st. have been transferred to Franklin Electoral Division

(*f*) The Launceston Suburbs include those portions of adjoining municipalities : St. Leonards, Evandale, Westbury, and Beaconsfield which are definitely suburban in character.

Note : The Census populations of Hobart and Launceston are corrected for absentees such as hop-pickers, school children, &c., who were absent at the time of the census.

VITAL STATISTICS.

TASMANIA, 1932.

In the following tables births which have occurred in Tasmania since 1920 have been allocated to the districts where the parents were usually resident, and deaths have been referred to the districts which included the usual residence of the deceased. The district rates are consequently true measures of the matters presented, except in so far as a district contains a hospital or infirmary where the inmates are domiciled for extended periods. Prior to 1920 it was customary to record births, deaths, and marriages as pertaining to the district in which the event occurred. The district rates for these earlier years, however, have been adjusted as far as practicable so as to be reasonably comparable with the later results.

NOTE.—Figures in parentheses refer to the year 1931, except where otherwise indicated.

INCREASE OF POPULATION, 1932.

The increase in the population of Tasmania during the year 1932 is estimated at 1720 (2746) persons, comprising 544 (1328) males and 1176 (1418) females. The addition to the population resulting from excess of births over deaths was 2469 (2705), but a great part of this total was offset by a loss from net migration amounting to 749 persons, giving the net increase to population of 1720 persons referred to above. The loss by migration is a customary feature of the population statistics of Tasmania, but this excess of departures over arrivals during 1932 was less marked than usual. Excluding the year 1931, which was exceptional in that a gain of 41 persons was recorded from net migration, the loss from this source during the five years preceding 1932 has averaged 2056 persons annually. Hence the year under review, although showing an actual loss from net migration, was a comparatively favourable one in this respect. Particulars of natural increase and net migration are set out below:—

Natural Increase (Excess of Births over Deaths).

	Males.	Females.	Total.
Births registered in 1932	2269	2222	4491
Deaths registered in 1932	1090	932	2022
Excess of Births	1179	1290	2469

Net Migration.

	Males.	Females.	Total.
Arrivals	16,673	14,946	31,619
Departures	17,308	15,060	32,368
Net Migration	— 635	— 114	— 749

BIRTHS.

The decline in the birth rate during 1932 was particularly pronounced, the rate falling sharply to 20·25 per thousand of population, which is the lowest yet reached in Tasmania. In the previous year the corresponding rate was 21·65, also a record low rate. The actual number of births registered during 1932 was 4491 (4762). The low level reached in 1932 represented the result of an almost continuous fall over the preceding ten years, the extent of the decline being indicated by comparison with the high rate of 27·08 births per thousand persons registered in the initial year, 1922, of that decade. The average of the birth rates during that period, 1922-31, was 23·78 per thousand persons.

The decline in the birth rate during 1932 extended generally over all districts in Tasmania. For the total Urban Division the rate was 17·0 (18·2) per thousand of population, falling in approximately the same proportion as in rural districts collectively at 22·8 (24·3) per thousand persons. Both of these rates for 1932 are well below their decennial averages, 21·2 and 25·7 per thousand respectively. In the urban area the fall was most pronounced in Devonport with a sudden drop in the birth rate from 24·4 in 1931 to 21·7 in 1932, but was less sharply marked in the metropolitan area and in Launceston with rates of 16·4 (17·1) and 17·0 (18·8) per thousand of population respectively. Fluctuations in the rates for the different rural districts were generally slight, one marked exception occurring in the North-Western Division with the decreased rate of 21·8 (25·5) births per thousand persons.

The following table gives a comparison between the town and country rates over an extended period, and shows the decline of the birth rate which has been a general experience for many years past:—

Births per 1000 *of Population.*

	1932.	1931.	1921-30.	1911-20.
Urban districts	17·0	18·2	21·8	26·9(*a*)
Rural districts	22·8	24·3	26·1	29·7(*a*)
Tasmania	20·25	21·65	24·32	28·12

(*a*) Approximate.

DEATHS.

There were 2022 (2057) deaths registered during the year 1932. The corresponding death rate per thousand of population, 9·12, was below the rate (9·35) in the previous year, and was lower also than the average of the death rates for the ten years preceding 1932, 9·57 per thousand persons.

The improvement in mortality during 1932 was in the aggregate only slight, and was confined mainly to the Urban Division. For this division as a whole the death rate declined to 10·5 (11·0) per thousand of population, the improvement being the result of lighter mortality in Hobart and suburbs and in Launceston, with lower rates of 11·0 (11·9) and 9·4 (10·0) per thousand persons. Exceptionally heavy mortality, however, was experienced in the remaining urban district, Devonport, where the rate of 10·6 deaths per thousand persons was recorded, in contrast to 8·2 in 1931 and 6·9 in 1930. For the whole rural area the death rate remained unchanged at 8·1 per thousand of population, approximating closely to its decennial average, 8·3 per thousand.

The urban death rate is adversely affected by the inclusion of deaths in the New Town Infirmary and the Consumptive Sanatorium, which properly should be distributed over the State. The rate for the Southern Rural Division is similarly affected by the location of the Mental Diseases Hospital within that division. The figures in the following table represent the results after distributing the deaths in those institutions on a population basis:—

Deaths per 1000 *of Population.*

	1932.	1931.	1921-30.
Urban districts	10·2	10·8	11·3
Rural districts	8·3	8·3	8·5
Tasmania	9·12	9·35	9·67

The incidence of various causes in these results is given below:—

Causes of Deaths.

Heart diseases, the principal class of disease causing death, accounted for 442 deaths during 1932, compared with 365 in 1931 and a decennial average of 295 deaths. The record number of deaths from this cause in 1932 may be ascribed in most part, not to any abnormal conditions, but to the more careful recording of causes of death by medical practitioners. The usual indefinite forms of causes of death shown each year were reduced considerably in number during 1932, with a corresponding addition to the specific causes, and, in particular, the unqualified form "senility" was returned in connection with only 78 deaths or less than half the corresponding total in the previous year. The more precise statement of cause of death generally given in these cases in 1932 showed heart disease in some form as a contributory cause in many instances and resulted in the increase in the heart disease group referred to above. The number of deaths from cancer registered during 1932 at 230 (220) was higher than in any previous year and was greatly above the decennial average, 184 deaths. Increased mortality was experienced also from diabetes, with 43 (22) deaths, and to a lesser degree from cerebral hæmorrhage and tuberculosis, with 122 (114) and 132 (122) deaths respectively. Decreases were shown in the number of deaths by suicide, 17 (30), from malformations and diseases of early infancy, 129 (142), and from nephritis, 66 (73).

INFANT MORTALITY.

A decided advance has been made in recent years in the lowering of infant mortality, and the results shown in 1932 were particularly satisfactory. The number of deaths of children under one year registered during 1932 was 185, compared with 219 in 1931 and 242 in 1930. The resultant rate per thousand births (41·2) was the lowest yet recorded in Tasmania, and represented an appreciable decline from the standards of previous years, corresponding rates being 46·0 in 1931, 50·6 in 1930, and 53·7 for the average of the rates for the ten years prior to 1932.

The improvement effected was greatest in the urban areas, where the infant mortality rate over the whole division fell to 48 (59) per thousand births, compared with a decennial average of 67 per thousand births. This low rate was due mainly to a record drop in the rate for Launceston to 41 (69) deaths per thousand births. Rural

districts in total showed the slightly lower rate of 37 (39) infant deaths per thousand births. The rates for the various rural localities, being based on small numbers, showed many extreme fluctuations, an instance being the almost doubled rate of 62 (32) deaths under one year per thousand births in the North Midland Division. The rise in the infant death rate for Devonport to 63 (23) per thousand births, contrary to the movements in the other urban districts, is another indication of the unreliability of such results.

The death rate for children under one month of age fell to 27·4 (32·3) per thousand births, but for deaths over one month and under twelve months the rate was practically unchanged at 13·8 (13·7) per thousand births. In the first group death is due commonly to prenatal causes, and in the latter to preventable causes. In previous years the decline in the infant death rate was the result mainly of reduced mortality from preventable causes, but the improvement during 1932 may be attributed to the increasing attention being directed in recent years to the prenatal care and treatment of mothers.

The following table gives a comparison of the number of deaths in each of the three chief groups of causes of deaths under one year.

	1932.	1931.	Average, 1922-31.
Diseases of respiratory system	26	23	34
Diseases of stomach	9	13	28
Pre-natal causes	123	140	158

The difference between town and country with respect to "preventable" infant mortality may be inferred from the following table:—

Infant Deaths Over One Month of Age per 1000 *Births.*

	1932.	1931.	Average, 1927-31.
Urban districts	16	17	26
Rural districts	12	12	16
Tasmania	13·8	13·7	20·1

STILL-BIRTHS.

The number of still-births registered during 1932 was 127, which was slightly greater than the corresponding total (118) in 1931, but less than that of 155 in 1930. These numbers are equivalent to 2·8, 2·4, and 3·1 per cent. of all births in their respective years. Still-births, together with deaths of children under one month, represented 56 (57) per thousand live births, while deaths of children over one month and under twelve months of age—that is, from preventable causes—were 14 (14) per thousand live births.

INFECTIOUS DISEASES.

The total number of cases of infectious diseases notified during 1932 was 1108 (1083). Scarlet fever increased in prevalence to 417 cases, compared with 265 in 1931, but the outbreak was not so severe as in 1930 when 485 cases were reported. The number of cases of diphtheria fell to 455 (589), but only slight changes occurred in other infectious diseases. Tuberculosis, with 168 (174) cases, was of relatively low incidence. The figures for the principal notifiable diseases are as follows:—

	1932.	1931.	1930.
Typhoid	25	22	27
Scarlet fever	417	265	485
Diphtheria	455	589	573
Phthisis	168	174	203
Syphilis	27	25	26
Puerperal fever	7	15	26

MARRIAGES.

There were 1506 marriages registered during 1932, approximately the same in number as in the previous year, but greater than the corresponding total of 1450 for 1930. The equivalent marriage rates per thousand of population were 6·78 in 1932, 6·83 in 1931, and 6·70 in 1930, all of which are low in comparison with the average of 7·16 for the rates over the ten years prior to 1932.

VITAL STATISTICS, AUSTRALASIA—GENERAL SUMMARY, 1932.

Other Diseases	26	30	30	38	28	16	18	19	18	9	70	68	61	54	65

Deaths in Public Hospitals (excepting the Infirmary and the Consumptive Sanatorium which are in the Hobart District and the Mental Diseases Hospital at New Norfolk) have been referred to the District in which the case originated. Deaths at sea are not included.

NOTE.—In the revised classification of causes of death adopted in 1931, the new classes of diseases formed are only approximately the same as the old classes. In consequence the figures rom 1931 onwards shown above are not strictly comparable with those for the previous years.

SUMMARY OF DEATHS—*continued.*

* Deaths which occurred at sea, or on foreign ships in Tasmanian waters, and were registered in Tasmania, are not included.
† Croup has been included with diphtheria since 1913.
§ Including cerebral apoplexy and arterioselerosis in association with cerebro-vascular lesion.
‡ These results are the arithmetic means of the rates for each of the five years.

Number of Minors married in 1932, 96 males, 450 females. For further particulars of age at marriage see Commonwealth Demography for 1932.

(a) 1505 marriages were solemnised in 1932. The number actually registered in 1932 was 1504.

METEOROLOGY.

SYNOPSIS OF THE WEATHER OVER TASMANIA DURING THE YEAR 1932.

The rainfall for 1932 was under average in the West Coast, Central Plateau, and Derwent Valley divisions, and in parts of the South, but over average elsewhere. Departures from normal were on the whole only slight, but an excess of about 20 per cent. of the average was recorded in parts of the Midlands.

This has been a year of marked fluctuations in rainfall, particularly in Southern districts. January was a dry month, and over the south-eastern half of the State totals ranged from less than ¼-inch to ½-inch at a majority of stations. For the two months December, 1931-January, 1932, the rainfall was the lowest on record at most stations in the Southern half. May was considerably drier than January, with less than ¼-inch over almost the whole of the eastern half. It was the driest May on record at most stations in these districts, and also at places in the north-west, and the driest since 1913 at many places elsewhere. The intervening months, especially March, were, on the other hand, exceptionally wet, except on the West Coast. March was the wettest on record at a number of north-western and southern stations. The total at Hobart (646 points) was the highest since 1854, and the highest for any month since December, 1916.

August and October were also wet months in the south-eastern quarter, August being the wettest since 1896. October totals were two or three times the average. In other cases rainfall was mainly below the average, but departures from normal were not very considerable. The December rainfall was over average in most districts, the excess being slight, except in the Midlands, where it amounted to 50 per cent. of normal.

Mean temperatures for the state as a whole were slightly below the average, but this was mainly the result of exceptionally cool conditions in February, and, to a lesser degree, in October and December. February was the coldest since 1902 or 1907 in parts of the north and west. The autumn and early spring months were very mild, with night minima two or three degrees above the average in April and September. Winter temperatures were about normal. There was comparatively little snow or frost.

The dry weather in the early summer (1931-32) resulted in one of the poorest cereal crops for years. Fruit crops maintained a good appearance, but the quality was affected by the abnormal conditions. Stock had a plentiful supply of dry feed, and retained good condition. The February rains greatly benefited all late crops, such as fruit, potatoes, &c., and the wet weather of the early autumn, followed by mild temperatures, caused a luxuriant growth in grass and early crops. The autumn was considered to be one of the best for years, especially in the midlands and north-east. Periods of fine weather in the winter enabled farmers to proceed with seasonal operations, and a large acreage was sown, particularly in the north. Except in parts of the south-east a bright outlook was maintained until October. At the end of September the season was said to be an exceptionally good one. Excessive rains in October gave some crops, such as oats and late fruits, a setback. There were also some losses of lambs and shorn sheep, due to severe conditions, and a little damage by frost to fruit, potatoes, &c. Hay was ripening at the end of November, after a spell of dry weather, and a light harvest was anticipated in some districts. A light setting of certain varieties of apples and pears was also reported. Rain early in December improved later crops and indications at the end of December pointed to satisfactory returns. The pastoral outlook was particularly bright, the growth of grass being the best for some years. The wool clip, though lighter than usual, was of good quality.

The following is a more detailed analysis of meteorological conditions during the year.

Mean air pressure was under average from January till April. In *January* a rapid succession of depressions of a combined Southern Ocean-monsoonal type passed at intervals of about two days. Although the Southern Ocean components developed considerable intensity at intervals, the systems were accompanied by warmth and high north-westerly to westerly winds, rather than by rain. Some fairly general light falls occurred, however, between the 8th and 13th, and on the 22nd. One or two anticyclones, between the 14th and 18th, developed moderate intensity. The movement of pressure systems in *February* was also rapid at intervals, but was interrupted by marked low pressure activity over Southern Ocean areas in the first few days and between the 18th and 27th, and over New South Wales and South Australia on the 7th-8th. Deep depressions developed on 1st and 5th. Cool weather was experienced at intervals, and only on two or three occasions during this month did daily maxima exceed 80 degrees. Several fairly general light to moderate rains occurred, but the best falls were recorded on 2nd and 12th. Heavy local falls, with thunderstorms, were reported from the Derwent Valley and midlands on 13th, and some damage was done by hail.

A rapid succession of depressions and anticyclones of moderate intensity was also a feature of the weather in *March,* and there were several short spells of warm weather. Depressions were of the combined Southern Ocean-monsoonal type, but monsoonal activity was much more pronounced than in previous months. Cyclonic centres formed over Bass Strait on 10th and 27th. The former moved southward over Tasmania, and from 2 to 5 inches of rain fell in 24 hours at many southern stations (Hobart, 327 points), with local flooding. The second disturbance was said to have been the most severe for 32 years on the north-west coast. Some damage was done by heavy seas at Burnie and other places, and from 2 to 4½ inches of rain was recorded in 24 hours at many stations (3 to 10 inches in 72 hours). Floods occurred in north-western rivers, and a few reports of damage to crops, &c., by excessive rain were received. Another depression of increasing intensity on 20th brought moderate to heavy rains to southern districts, with cold and rough southerly weather, and the first snow of the year fell on the highlands.

April was the cloudiest on record at Hobart. High pressure over Tasmania, opposed to persistent monsoonal low pressure over the remainder of the Commonwealth, early this month resulted in a spell of cool south-easterly weather over the State. An intense Southern Ocean depression on 9th-11th brought a general rain, with heavy falls over the northern half. Some moderate flooding occurred in north-eastern rivers. This was followed by an intense anticyclone, and barometers rose to over 30·5 inches on 13th. Low pressure developments reached their maximum stage over South Australia during the early part of the month, but activity became pronounced over Tasmania and Southern Ocean areas from 16th-22nd when a spell of mild unsettled north-westerly to south-westerly weather prevailed, with several fairly general rains. High winds were experienced at times (Hobart, 61 miles per hour on 19th). Subsidiary depressions in the last week and early in *May* caused further showers, but a long period of high pressure followed, lasting until the end of May. Intense and slowly moving anticyclones covered the State during practically the whole of this month. A weakening in pressure occurred as a monsoonal depression passed over the Eastern States on the 19th-21st, and as slight activity again developed over Southern Ocean areas at intervals later. Cool weather prevailed from 14th-25th, otherwise temperatures were very mild. The highest barometer readings for the year occurred on 15th (Hobart, 30·666 inches). The mean pressure at Hobart (30·220 inches) and sunshine (184·7 hours) were the highest on record for May. Mean pressure for *June* was about ·15 inch below normal. Slight low pressure activity occurred over the Southern Ocean in the first week or so, and after a short interval of high pressure, accompanied by cold temperatures and many frosts, on the 9th-10th a period of marked activity set in over the Southern Ocean, the Tasman Sea, and New Zealand. A heavy north-easterly rain on 12th-13th resulted in moderate flooding in north-eastern rivers. Cold, showery weather prevailed at intervals from 15th to 20th and 24th-26th, with falls of snow on the highlands (Miena, 6 inches on 26th). A depression on the 24th suddenly increased in intensity, and caused westerly to south-westerly gales and high seas in Bass Strait. Some damage was done by wind in the north-west and on King Island. This series of disturbances was followed by a period of high pressure, with many frosts.

Mean monthly pressure now remained well above normal until the end of November. Rapid pressure fluctuations occurred in *July.* Depressions tended to develop their maximum intensity west of the Bight or off the New South Wales coast. One or two severe cyclonic disturbances persisted over the latter region, and rough southerly weather was experienced off the east coast of Tasmania between the 7th and 10th. Most of the month's rainfall over the south-eastern half of the State occurred at this time. In the north and west a good rain fell, with a depression of moderate intensity on 4th-5th, and light showers persisted at frequent intervals during the latter half of the month. A slight cyclonic development over Western Victoria on 30th also resulted in moderate to heavy falls in the north-west quarter. The Derwent Valley received only very light showers, and it was the driest July here for 23 years or more. Cold weather from 10th-16th July and 27th July-3rd August was accompanied by many sharp frosts. Three of the six depressions which passed in *August* developed moderate to rather considerable intensity, the first becoming cyclonic over the western Tasman Sea. As a result, the 5th-8th, 12th-15th, and, over northern districts, 29th-31st, were very wet periods. Northern rivers were in flood at times, the South Esk rising to over 13 feet at Avoca on 13th, and over 11 feet at Fingal on 30th. Some snow also fell on the highlands, the fall of the 14th extending over eastern districts to unusually low levels. Anticyclones in July and August were of moderate and fluctuating intensity, and mainly followed a path over Southern Australia. A very intense system built up over South Australia on 15th August, and Tasmanian barometeers rose to over 30·5 inches on 17th. In *September,* as in May, barometers were high during almost the whole month. Low pressure activity subsided in the first week, but a secondary depression developed on the 1st, and high winds caused some damage to light structures in the north and west, where some moderate rains were recorded. A moderate fall of snow occurred on the highlands (Miena, 4 inches). An intense anticyclonic nucleus built up over Tasmania on the 8th, and barometer readings (Hobart, 30·660) were the highest recorded in September since 1846. A succession of intense "highs" followed, with one or two intervals of relatively low pressure.

Monsoonal low pressure influence became active about the middle of September, causing some light rain in Tasmania between 10th-14th and 20th 24th. Cyclonic depressions developed considerable intensity off the eastern entrance to Bass Strait between 12th and 22nd *October*, and much rain resulted, with rough southerly weather. Some flooding occurred in eastern and midland rivers (South Esk 13 feet above summer level, at Fingal, on 20th). Cool temperatures were experienced from 8th to 24th, as an anticyclone remained almost stationary over the Bight.

Low pressure activity over the neighbouring Southern Ocean areas resulted in rather rough north-westerly to south-westerly weather and showers from the 7th-9th October, 30th October-5th November, and 21st-25th November. Three inches of snow was reported from Central Plateau stations on 8th October and 4th November. With these exceptions, depressions were of a Southern Ocean-monsoonal type, and of moderate intensity, passing at intervals of from four to seven days, from the end of September to the end of December. Some timely rains occurred in *November* and *December*, but several depressions, especially in November, were accompanied mainly by heat and strong north-westerly winds. Other cyclonic developments occurred over Victoria and eastern Tasmania on 14th November and 7th and 23rd December. The first was of little intensity, but a few heavy local rains occurred in North-Eastern Tasmania (Mathinna, 206 points in three-quarters of an hour). Rough south-westerly weather was experienced on 24th and 25th December. Several periods of cool weather occurred during this month as a result of low pressure activity to the eastward. Anticyclones were generally of moderate intensity during the last three months, following a path across the Bight and South-Eastern States with a normal rate of movement.

The following is a summary of the Hobart monthly temperature and rainfall:—

Month.	Mean Temperature.	Normal Temperature.	Rainfall (Inches.)	Normal Rainfall (Inches.)
January	62·6	62·0	0·28	1·86
February	61·2	62·4	1·32	1·48
March	59·7	59·4	6·46	1·70
April	55·1	55·2	3·10	1·91
May	51·8	50·6	0·35	1·89
June	47·2	46·9	2·48	2·23
July	45·8	45·8	2·20	2·17
August	48·2	48·0	4·59	1·81
September	51·4	51·0	1·63	2·09
October	52·6	54·0	4·15	2·29
November	57·9	57·0	1·26	2·47
December	58·5	60·2	2·47	2·01
Year	54·3	54·4	30·29	23·91

The highest maximum temperature was 93·1 degrees on 27th January, and the lowest minimum 32·0 degrees on 10th June and 28th August. The highest maximum temperature on record is 105·2 degrees on 30th December, 1897, and the lowest minimum on record is 27·0 degrees on 18th July, 1866.

The rainfall during the year for the various districts, as reported by telegraph, is summarised in the following table:—

District.	Mean District Rainfall, 1932.	Average for Previous Years.	Percentage Departure from Normal.
	in.	in.	%
Northern	41·65	39·64	5 above normal
West Coast	71·68	77·86	8 below normal
Central Plateau	30·60	35·41	14 „ „
Derwent Valley	20·39	21·21	4 „ „
Midlands	25·73	21·75	18 above normal
East Coast	34·10	30·95	10 „ „
South-East	31·45	27·72	13 „ „
Flinders Island	28·58	26·02	10 „ „
King Island	29·30	34·25	14 below normal

TASMANIAN TRADE.

Twelve Months ending 30th June, 1933.

(Figures in parentheses are those for the corresponding period of 1931-32.)

The figures shown in the following tables represent the values of the trade of Tasmania as compiled from documents presented by the importers and exporters respectively.

Imports for the year 1932-33 were valued at £6,796,100 (£6,533,900), an increase of £262,200, or 4 per cent. on the figure for 1931-32. Oversea imports were responsible for £564,500 (£565,000), representing 8·3 (8·6) per cent. of total imports, while interstate imports accounted for £6,231,600 (£5,968,900), or 91·7 (91·4) per cent. of the total.

Exports for the year, valued at £6,685,700 (£7,043,000), declined by £357,300, or 5·1 per cent. Direct oversea exports, which were equivalent to 26·8 (29·1) per cent. of the total, decreased from £2,052,800 in 1931-32 to £1,790,400 in 1932-33, a fall of £262,400, or 12·8 per cent.

Owing to the rates of foreign exchange operating throughout the year, it is necessary to moderate the values of either imports or exports before the figures are properly comparable. During 1932-33 the Australian rate of exchange on London stood at 25 per cent., and oversea imports, valued in sterling at £564,500, must therefore be increased to £705,600 to indicate a value in exchange against exports.

Compared with the average of the previous five years, the total trade declined by £3,561,000, or 20·9 per cent., imports falling by £1,679,000, or 19·9 per cent., and exports by £1,882,000, or 22 per cent.

THE TRADE POSITION.

The following table shows clearly the "visible balance of trade" for the last ten years:—

	Total Trade. £1000.	Imports. £1000.	Exports. £1000.	Excess of Exports. £1000.	Excess of Imports. £1000.	Imports as a Percentage of Exports.
1923-24	18,652	9809	8843	....	965	110·9
1924-25	17,656	8808	8848	40	....	99·5
1925-26	17,162	8451	8711	260	....	97·0
1926-27	18,843	9406	9437	31	....	99·7
1927-28	19,490	9529	9961	432	....	95·7
1928-29	18,998	9235	9763	528	....	94·6
1929-30	18,936	9848	9088	....	760	108·4
1930-31	14,328	7344 (*a*)	6984	....	360	105·2
1931-32	13,726	6683 (*a*)	7043	360	....	94·9
1932-33	13,623	6937 (*a*)	6686	....	251	103·8

(*a*) Value calculated for the purpose of this table. The recorded values were: 1930-31, £7,230,000; 1931-32, £6,534,000; 1932-33, £6,796,000.

In view of the many "invisible" factors involved in international exchanges, a precise statement of the "balance of payments" as at any particular time for any country is a matter of great difficulty, and the case of Tasmania in this regard is not less difficult than that of most other countries. In Tasmania a more than ordinary amount of the activity of the community is devoted to providing for mainland tourists, a service which has the same effect on the trade balance as an export of goods, though no entry appears in the trade statistics on its account. On the other hand, there are services such as shipping, banking, &c., which enter into the equation, but which cannot be valued with even a reasonable degree of accuracy.

The figures submitted, therefore, are those arising from the visible interchange of commodities to which definite values can be given.

Subject to these limitations, therefore, there was a large balance of imports over exports in 1923-24. This corresponds with large governmental borrowings on Loan Account outside Tasmania and the investment of external capital in local industrial enterprises. From 1924-25 to 1928-29, exports exceeded imports in every instance, the surplus in the latter year reaching the very high figure of £528,000. In 1929-30, the balance was again largely in favour of imports, the excess amounting to £760,000, despite an export of £426,000 of gold in connection with the Australian exchange

difficulty. Similary in 1930-31 with gold exports amounting to £120,000, imports were in excess by £360,000 after correcting the sterling values of oversea imports, while for the year 1931-32 a favourable balance of £360,000 was shown without the assistance of any accumulated gold in the State's exports. During the year under review the balance has again swung in favour of imports to the extent of £251,000.

From the figures given it will be seen that the total value of trade in 1932-33 was the lowest recorded since the compilation of interstate trade statistics was reinstituted in 1922-23.

The figures shown in the following tables include goods transferred to the mainland ports for transhipment to oversea countries, and similarly, interstate imports include goods from oversea countries received through the mainland States.

The value of trade for Hobart, including its sub-ports on the Huon River and elsewhere, which represented more than half the total trade of the State, decreased from £6,938,000, in 1931-32, to £6,774,000, in 1932-33, a drop of £164,000, or 2·4 per cent. Likewise, trade at Launceston declined by £40,000, or 1 per cent., from £4,215,000 to £4,175,000. On the other hand, the returns for Strahan, Smithton, Stanley and Ulverstone recorded increases. Contributions to the total trade made by the various ports during the last two years, expressed as percentages, were as follows:—Hobart, 50·2 (51·1) per cent.; Launceston, 31 (31) per cent.; Burnie, 6·4 (6) per cent.; Devonport, 5·2 (4·7) per cent.; Strahan, 3·9 (4·2) per cent.; and Stanley, 1·2 (1) per cent.

CHARACTER OF TRADE.

IMPORTS.

(Recorded Values.)

The principal classes of imports were:—Food and drink (except alcoholic liquors), £1,486,000 (£1,545,000); clothing and textiles, £1,367,000 (£1,238,000); metals and machinery (including vehicles), £1,084,000 (£892,000); stones and minerals, £515,000 (£616,000); tobacco, £365,000 (£340,000); drugs and chemicals, £290,000 (£282,000); oils and paints, £273,000 (£233,000); paper and stationery, £239,000 (£227,000); and animal substances, £169,000 (£207,000).

The items set out hereunder are mainly responsible for the variations in 1932-33, as compared with 1931-32.

Increases.—Other textiles and drapery, £80,200; motor-chassis and parts, £38,900; metals and metal manufactures, £37,700; motor-cars, £25,400; tobacco, £25,000; jewellery and fancy goods, £21,600; lubricating oil, £16,900; films, £15,000; motor-car bodies, £14,700; machinery (unspecified), £14,300; kerosene, £14,000; floor coverings, £13,700; agricultural machinery, £13,400; tinned plates, £13,400; apparel, £11,500; crockery, £11,400; paper and stationery, £11,200; electrical machinery and appliances, £10,900; asphalt, £10,200; bags and sacks, £9500; pipes and tubes, £8600; wood manufactures, £8400; manufactured fibres, other, £8400; drugs and chemicals, £8200; petroleum, £8000; flour, £7900; iron and steel (bar, rod, &c.), £7900; sheep, £7900; foodstuffs of animal origin, £7900 (mainly meat and fish, £4300); wheat £7800; ale and beer, £6900; glass and glassware, £6300; mining machinery, £6300; bottles, flasks, and jars, £5500; timber, £5500; and piece goods, £5200.

Decreases.—Zinc ores, £102,800; sugar, £53,300; oats, £26,400; wool, £33,700; wines and spirits, £13,800; coal, £10,900; rubber goods, £10,600; fresh fruits, £7700; leather, unmanufactured, £6400; samples, £5800; and horses, £4900.

The class showing the largest increase was Class XII., metals, metal manufactures, and machinery, with a rise of £192,000. The items mainly responsible were motor-cars, chassis, chassis parts, and motor-car bodies, which increased by £79,000, machinery, £44,900, and metals and metal manufactures, £37,700. Class VIII., apparel, textiles, and manufactured fibres also recorded a substantial rise during the year, the chief increase being other textiles and drapery, £80,200, followed by floor coverings, £13,700, and apparel, £11,500.

The class showing the largest decline was Class XI., stones and minerals, including ores and concentrates, with a drop of £101,000, mainly owing to a reduction of calcines. Food and drink came next in order of decline, with a decrease of £58,000, mainly due to smaller imports of sugar, oats, and fresh fruits, followed by animal substances, £38,000.

EXPORTS.

Exports for the year 1932-33 were valued at £6,685,700 (£7,043,000), a decline of £357,300, or 5·1 per cent., when compared with the figure for the previous year.

The principal variations from 1931-32 are set out below:—

Increases.—Timber, £75,300; peas, unprepared, £70,400; butter, £55,000; tin ingots and ores, £48,200; wool, £30,000; motor-cars, £29,200; zinc, £29,000; gold and silver specie, £27,500; cement, £22,800; cadmium, £22,200; films, £15,700; other drapery, apparel, and textiles, £14,000; barley, £10,800; calcium carbide, £10,300; tanning bark, £9200; pulped fruits, £8200; zinc residues, £6800; tobacco, £6700; limestone, £6500; other food and drink, £6100; sheep skins, £5900; apparel and attire, £4200; and swedes and turnips, £5200.

Decreases.—Fresh fruits, £419,800; rubber goods, £184,200; copper, £55,900; hops, £52,400; woollen and worsted manufactures, £50,900; furred skins, £43,300; jams and jellies, £40,700; potatoes, £23,800; osmiridium, £12,300; cattle, £11,300; preserved fruits, £6700; sheep, £6500; and oatmeal and rolled oats, £5600.

The trade in timber increased substantially during the year, the shipments of sawn timber rising from 13,100,000 super. feet in 1931-32 to 19,700,000 super. feet in 1932-33, with a corresponding increase in value of £66,600. Since 1930-31 the export of timber has more than doubled, an indication of the growing demand for Tasmanian timbers, due to increased building activity on the mainland.

Returns from the pea shipments showed an advance of £70,400 on the figure for 1931-32, while the quantity exported exceeded that of last year by over 200,000 bushels. Exports to United Kingdom totalled 318,000 bushels, valued at £102,200, against 141,600 bushels to the value of £46,400 shipped last year.

The most notable decline in exports was recorded in the values of fresh fruits, with a drop of £419,800. Apple-growers suffered considerably through the ruinous prices realized for oversea consignments. The quantity so exported during the season totalled 3,079,000 bushels, compared with 3,332,000 bushels last year, with a f.o.b. value of £269,400 and £583,100 respectively. The decline in price was offset to some degree by a grant of £63,800 made by the Federal Government to assist the industry. Interstate shipments totalled 1,422,900 cases, returning £373,300 at an average price of 5s. 3d. per case, compared with 1,891,500 cases valued at £460,900, or 4s. 10d. per case shipped in 1931-32.

Copper prices declined during the year, and a drop of £55,900 was recorded in the total of 10,426 tons shipped, compared with 10,561 tons exported last year.

Rubber goods decreased by £184,200, mainly on account of the closing down of the Rapson Tyre Company's factory at Launceston.

Taking food and foodstuffs as a class, the exports decreased from £2,885,000 in 1931-32 to £2,495,000 in 1932-33, a fall of £390,000. This class represented 37 (41) per cent. of total exports for the year.

Potato shipments, at 68,566 tons, increased by 9100 tons on last year's exports, but the values declined from £375,700 in 1931-32 to £351,800 in 1932-33. The average price for the year was £5 2s. per ton, compared with £6 6s. per ton, the price realised during 1931-32.

H. J. EXLEY, Deputy-Statistician,
Commonwealth Bureau of Census and
Statistics, Tasmanian Branch.

Hobart, 28th March, 1934.

IMPORTS AND EXPORTS, YEARS 1896 TO 1932-33.

NOTE.—The figures for the years 1910 to 1921-22 represent Direct Oversea Trade only, because no records of Interstate Trade or Oversea Trade transhipped in Mainland Ports were made during those years.

*Penguin.

† NOTE.—The figures given for each port in the last three tables above do *not* take into account coastal movements of shipping. Ships are recorded as arrivals at the *first* Tasmanian port of call only, and as departures only at the last port of call in Tasmania. A vessel coming direct to Stanley from Melbourne, calling at Burnie, Ulverstone, Devonport, and Launceston, and leaving the latter port for Sydney, would be recorded only as an arrival at Stanley and a departure from Launceston. For total shipping (including coastwise) at each port see page 39.

AGRICULTURE AND LIVESTOCK.

REPORT FOR 1932-33.

CROPS in 1932-33.

The total area under crop in 1932-33 was 279,000 acres, an increase of 31,800 acres or 12·8 per cent. on the previous year, and some 4300 acres more than the average of the past decennium. Grain crops, principally wheat, oats, and peas, which were seriously affected by climatic conditions at seeding time in 1931-32, were mainly responsible for the expansion, with an increase of 28,300 acres. Hay also increased by about 10 per cent., while a slight drop was recorded in potatoes and other root crops.

Conditions throughout the season were good, and in most instances yields were higher than last year, and well above the average of the past 10 years. Prices, however, were low, and the heavier crop yields were more than offset by the low values prevailing during the year. The total city value of agricultural produce was £2,477,000, compared with £2,821,000 in 1931-32, a decline of £344,000, or 12·2 per cent., while pastoral produce decreased from £1,866,300 in 1931-32 to £1,805,400 in 1932-33, a fall of £60,900, or 3·3 per cent., making a total decline of £404,900, or 8·6 per cent.

WHEAT.

The area sown to wheat increased from 11,700 acres in 1931-32 to 21,000 acres in 1932-33, and was more than 1500 acres greater than the average of the last decade. The average yield was 5 bushels higher than last year, and the production was 433,000 bushels, compared with 183,000 bushels last year, and 425,000 bushels, the average of the past decennium.

BARLEY.

The area sown to barley was 8600 acres, an increase of 200 acres on the previous year. Production amounted to 211,500 bushels, 201,500 bushels of which were English barley and 10,000 bushels of the Cape variety. The average yield per acre was 24·65 bushels for the former and 23·98 bushels for the latter.

OATS AND HAY.

Both varieties of oats recorded substantial increases in acreage on those sown in 1931-32. Algerians expanded by more than 8100 acres and Whites by 4100 acres, the total area advancing from 18,400 to 30,600 acres. The latter figure, however, was still nearly 11,000 acres less than the average of the past ten years. Average yields were obtained, and 828,000 bushels were threshed, compared with 357,000 bushels in 1931-32 and 1,129,000 bushels annually harvested during the past decennium.

The area under hay was 92,700 acres. Production amounted to 141,000 tons, an increase of nearly 50,000 tons on the output in 1931-32 and 13,000 tons on the decennial average.

PEAS.

The acreage of peas increased from 21,500 acres in 1931-32 to 28,000 acres in 1932-33, Blues rising by 3100 acres and Greys by 3400 acres. The production, owing to favourable climatic conditions, amounted to 621,000 bushels, an increase of 369,000 bushels on the yield of last year and 221,000 bushels on the decennial average.

POTATOES.

The area under potatoes was 35,800 acres, a decline of 600 acres on the area planted last year. With a yield of $2\frac{3}{4}$ tons to the acre, production amounted to 98,000 tons, exceeding the output of 1931-32 by 2800 tons and the decennial average by 1900 tons. Turnips and other root crops also recorded reduced acreages.

HOPS.

A further decline of 67 acres was recorded in the area planted to hops, and, during the last ten years, nearly half the former acreage has gone out of cultivation. The production during the season under review was 1,384,000 lb., compared with 1,598,000 lb. in 1931-32.

APPLES.

The area devoted to fruit was 32,774 acres, of which apple trees accounted for 26,224 acres, or 80 per cent. of the total, representing an increase of 200 acres on last year's area. The yield of 4,410,000 bushels, while not as high as the record crop of 5,844,000 bushels produced in 1931-32, was well above the average of the last ten years. Unfortunately for growers, the prices realized for oversea shipments were disastrously low, and the f.o.b. value for the 3,128,000 bushels shipped returned only £273,700, or 1s. 9d. per case. Oversea shippers, however, benefited by a grant of £63,800 made by the Federal Government to assist the industry. Interstate shipments proved more profitable, a return of £250,300 being received from 1,027,000 bushels exported to the mainland States. The total value of the output delivered at port of shipment, estimated at £524,000, contrasted with £1,131,000 realized for the previous year's shipments.

Particulars of production and values during the last five years are as follow:—

1932-33.	Production.	Value at Port of Shipment.
	Bushels.	£
Exports, overseas	3,128,000	337,500(a)
Exports, interstate	1,027,000	250,300
Used in factories and local consumption	255,000	27,200
Total	4,410,000	615,000
1931-32	5,844,000	1,168,000
1930-31	3,800,000	950,000
1929-30	3,950,000	663,000
1928-29	2,500,000	937,000

(a) Includes bounty paid in Tasmania, £63,800.

LIVESTOCK (at 31st December, 1932.)

HORSES.

The decrease in the number of horses was about 420, reducing the total to 30,269, compared with 30,689 in 1931.

CATTLE.

The total number of cattle increased by 18,200 during the year. Dairy cows, calves, and heifers increased by 11,900 and working bullocks and other cattle by 6300.

SHEEP.

The number of sheep increased by 27,000 on the figures for 1931. The total number now recorded being 2,041,000, distributed as follows:—

Ewes	830,000	41 per cent.
Lambs	500,000	24 per cent.
Other sheep	711,000	35 per cent.
Total	2,041,000	100 per cent.

PIGS.

The number of pigs was 41,000, practically the same number as last year.

VALUE OF FARM PRODUCTION.

Estimated net value, on farm, of production available for market.

	1932-33.	1931-32.	1930-31.	1929-30.
	£	£	£	£

(*a*) The figures given are for stock slaughtered, plus exports, minus imports, at appropriate prices.
(*b*) Includes estimate for unrecorded production based on actual exports.

VALUE OF PRODUCTION (NET).

(APPROXIMATE.)

The following table gives an estimate of the quantities and values of net agricultural and pastoral production for the past five years. The quantities given are the quantities marketed together with an allowance for consumption by the producers and their families. The values differ from the "farm" values of individual products given on the preceding page, chiefly by deduction of hay and other forage used on the farm in order to obtain other products which are marketed. A general deduction is made for expenditure on fertilisers, spray material, sheep-dip, &c. A further deduction should be made for cost of upkeep of buildings, fences and implements and for depreciation, but sufficient data are not yet available to make a satisfactory estimate of these costs.

Unlike the values on the previous page, these values *can be added together without duplication.* But only the final total for all agricultural and pastoral production together has real significance, because agricultural products consumed on the farm (and therefore not counted here) are used to produce the marketed stock, milk, and wool, which are here given their full farm values; i.e., the agricultural and pastoral industries are inseparable.

NOTE.—The percentage in the last column is designed to give an approximate measure of the proportion of farming and pastoral land excluding Crown leases and licences, that is rented from the owner. Share farms are left out as being intermediate in their nature. The figure given is the percentage of rented land to the total made up of rented land, freehold occupation and Crown land in process of purchase on time payment.

MANUFACTURING PRODUCTION: TASMANIA.

Report for 1932-33.

(Figures in parentheses are those for corresponding periods of 1931-32.)

For statistical purposes in Australia a factory is an establishment engaged in secondary production, which uses power or employs more than three persons. Certain industries, however, such as construction works (buildings, wharves, bridges, and roads), threshing and slaughtering have never been included in the Commonwealth schedule of manufacturing industries. In the year 1930-31, as the result of a resolution of the Conference of Statisticians, 1930, a new classification of industries was adopted; consequently care is needed when comparing class totals, as the groupings may not now be identically the same as in the years prior to 1930-31.

NUMBER OF FACTORIES.

Returns were furnished for the year 1932-33 by 910 factories, compared with 891 in 1931-32, and 805 in 1930-31. The increase in the number of establishments during the past two years, amounting to over 100, has been particularly marked, but part, at least, of this increase was due to greater efforts made to secure returns from all establishments. The total for 1932-33 was a record one, and was well above the average of 746 over the ten preceding years. Changes in individual classes of manufacturing in 1932-33 were comparatively unimportant, the most notable being small additions to the bread, biscuits, and confectionery class, with 66 (53) establishments, and to the number of sawmills, 206 (196).

HANDS EMPLOYED.

On an average for the whole year 1932-33, there were 9233 workers engaged in the manufacturing industry, or 233 more than in the previous year. Of this increase, 148 were males and 85 females, representing gains in employment of 2 per cent. and 4 per cent. respectively. Compared with last year, increases in the number of workers were greatest in sawmilling and in jam, canning, and pickle factories The number of male workers in sawmilling rose to 767 (605), while in jam, canning, and pickle factories both males and females were considerably higher in number at 378 (313) and 100 (72) respectively. Other main classes which showed an increased number of male workers were bread, biscuits, and confectionery works, 599 (539), joineries, 195 (151), and chaff-cutting, 162 (123). Increases in female workers were recorded chiefly in the bread, biscuits, and confectionery class, 243 (193), and in clothing and tailoring (including shirt and collar making) at 267 (242). In the rubber goods class, owing mainly to the closing of the largest factory in the group, there was a pronounced falling off in employment, the number of male workers dropping to 44 (181) Of decreases in other industries, the principal were in printing and binding with 500 (610) males, and in the dried fruits class, where both males and females dropped in number to 20 (38).

The following table gives a classification of hands employed according to the size of the factory in which they work:—

PERCENTAGE OF WORKERS IN FACTORIES.

Classification of Factory.	Tasmania.					Australia.
	1913.	1920.	1930-31.	1931-32.	1932-33.	1931-32.
1- 20 workers	38	32	41	43	43	28
21- 50 workers	21	26	14	14	14	18
51-100 workers	10	23	10	6	8	12
101 and over	31	19	35	37	35	42
Totals....	100	100	100	100	100	100

The distribution of hands between large and small establishments remained the same as in 1931-32. In the two groups of large factories, however, a minor increase was revealed in the proportion of workers in factories employing between 50 and 100 hands, which rose to 8 (6) per cent. of all workers, while the corresponding figure for workers in factories with over 100 hands fell to 35 (37) per cent. In the latter class,

the average number of hands per establishment was 308, which was higher than the corresponding averages in 1931-32 for both Tasmania and the Commonwealth as a whole, which were 293 and 267 respectively. The average number of workers over all factories in Tasmania for 1932-33 was 11·6, the same as in the previous year, but much smaller than the Commonwealth average of 16·2 for 1931-32.

OUTPUT AND PRODUCTION.

The consideration of the activities of various industries requires differentiation between "value of output" or the gross value of goods delivered from the factory, and "value of production," or "net production," which is the value added to raw materials used in the factory in the process of manufacture. To obtain the actual value of the wealth so produced by factory processes the costs of manufacture must be as far as possible deducted from the value of output. Such costs are the value of raw materials used; wrappers and containers, the cost of fuel, power, light, water, and other stores; tools replaced and repairs to plant; and depreciation. Wages, in relation to industry as a whole, are reckoned, not as a cost of manufacture, but as the share of the value of production accruing to labour from its co-operation with capital. At present, also, no deduction is made for depreciation owing to the impossibility of getting figures completely accurate and consistent.

The following table sets out the allotment of the gross value of output between these items for the last five years:—

	1928-29.	1929-30.	1930-31.	1931-32.	1932-33.
	£	£	£	£	£
Output	8,475,916	8,560,452	6,115,567	6,423,177	6,563,083
Raw material	4,015,280	4,012,745	2,462,764	2,808,890	2,894,489
All other costs (excluding wages and depreciation)	905,342	985,482	845,306	805,904	789,157
Net production	3,555,294	3,562,225	2,807,497	2,808,383	2,879,437
Labour cost	2,018,169	2,154,053	1,645,108	1,522,931	1,524,947
Unallotted balance	1,537,125	1,408,172	1,162,389	1,285,452	1,354,490
	%	%	%	%	%
Labour cost per cent. of net production	56·8	60·5	58·6	54·2	52·96
	£	£	£	£	£
Net production per £100 labour cost	176	165	171	184	189

The gross ouput for 1932-33 amounted to £6,563,000 (£6,423,000), and net production to £2,879,000 (£2,808,000). After deducting labour costs from net production, an "unallotted balance" of £1,354,000 (£1,285,000) remained for distribution among overhead charges and profits, together with an allowance for depreciation. Net production, which forms the best indication of the activities of the factories of the State, had for a number of years been valued at about £3,600,000, but with the onset of the business depression the value dropped in 1930-31 to approximately £2,800,000, and remained the same in the following year. In the year under review, there was only a slight improvement in the value of net production, with a rise to £2,879,000 (£2,808,000). When reckoned in relation to labour cost, however, net production has shown a consistent rise over the depression years. For each £100 expended in salaries and wages, the average value of net production was £189 in 1932-33, against £184 in 1931-32, and £171 in 1930-31. For the five years preceding 1930-31, net production averaged £171 per £100 labour cost. The aggregate cost of raw materials rose in the same proportion as the gross output and amounted to £2,894,000 (£2,809,000), forming 44 (44) per cent. of the total output. The amount paid in salaries and wages during 1932-33, £1,525,000 (£1,523,000), was slightly higher than in the previous year.

The following figures show the trend during recent years of net production in the chief industries:—

Industry.	Net Production.					Net Production per £100 of Labour Cost.
	1928-29.	1929-30.	1930-31.	1931-32.	1932-33.	1932-33.
	£	£	£	£	£	£
Lime, cement, &c.	95,278	73,859	73,445(a)	101,508(a)	132,430(a)	328
Sawmills	211,969	255,122	118,101	126,773	155,805	129
Metal extraction	769,330	697,067	656,913	454,416(c)	493,670(c)	184
Biscuits, confectionery, &c.	217,238	189,085	154,883	170,489	183,837	144
Jam-pulp, &c.	198,514	165,626	95,576	152,693	162,612	175
Woollen mills	239,228	237,945	293,365	367,895	398,716	220
Books, printing, &c.	224,674	231,048	193,410	189,535	184,857	138
Cycle and motor works	110,337	118,207	79,591	76,831	74,226	138
Heat, light, and power (including carbide)	345,711	348,523	268,810(b)	338,681(b)	324,847(b)	813

(a) Including carbide. (b) Excluding carbide. (c) Including engineering (not marine or electrical).

As may be seen from the table, net production increased in value in 1932-33 over the greater portion of the manufacturing industry. The principal increase occurred in the lime and cement (including carbide) class, with net production valued at £132,430 in 1932-33, against £101,508 in 1931-32, and £73,445 in 1930-41. Marked increases in net production were recorded also in sawmilling, £155,805 (£126,773), in metal extraction and engineering (other than marine or electrical), £493,670 (£454,416) and in woollen mills, £398,716 (£367,895). These increases were offset to a great extent by a loss in the rubber goods class. The cessation of work which has been mentioned in the chief factory of this class resulted in a fall in net production for all rubber goods to £9148 (£54,177). Net production decreased in a lesser degree in printing and binding, £184,857 (£189,535), in cycle and motor works, £74,226 (£76,831), and in heat, light, and power works, £324,847 (£338,681).

COST OF MANUFACTURE.

Raw materials were greater in cost in substantially the same classes as noted above with an increased net production, viz., joineries, £37,127 (£25,571), the cement and lime (including carbide) class £43,828 (£32,371), metal extraction (including engineering other than marine or electrical), £738,409 (£616,449), and sawmilling, £111,989 (£93,250). In rubber works, owing to the restriction in production previously mentioned, raw materials dropped in cost to only £4003, compared with £113,643 in the previous year. Of the remaining industries, decreases occurred principally in dried fruits factories, £5897 (£10,441), in tanning and fellmongery (including furriers), £13,969 (£20,583), and in railway and tramway workshops, £15,723 (£22,370). Other items in the cost of manufacture, excluding raw materials, wages, and depreciation, fell slightly in the aggregate to £789,157 (£805,904). The rubber goods class again accounted for the bulk of this decrease, the total for "other costs" in this group dropping to £944 (£14,517).

LABOUR COSTS.

Although the total for wages and salaries for the year 1932-33 at £1,524,947 (£1,522,931) was slightly higher than in the preceding year, the average payment per worker fell slightly. For all workers, including working proprietors, the average amount paid in salaries and wages in 1932-33 was £190 (£194) for males, and £80 (£83) for females. Omitting working proprietors, managers, overseers, accountants, and clerks from the total, the average wage received was £171 (£172) for males and £74 (£78) for females. The average payment for the year for all workers, male and female, fell to £165, compared with £169 in 1931-32 and £186 in 1930-31.

FIXED CAPITAL.

At the end of the year 1932-33 the value of fixed capital investments stood at £8,661,000, or £569,000 lower than at the end of the preceding year. Of this total fixed capital, £2,629,000 (£2,774,000), was represented by land and buildings and £6,032,000 (£6,456,000) by plant and machinery. Over half the fall in value of fixed capital was due to the cessation of production mentioned in the rubber class, where the total value of land and buildings by the end of 1932-33 fell to £16,000 (£141,000) and plant and machinery to £5000 (£166,000). Motor and cycle works showed a small decrease in land and buildings at £180,000 (£194,000). The other principal classes in which the capital value of plant and machinery was lower were the cement and lime (including carbide) group, £264,000 (£322,000), and metal extraction and engineering (other than marine or electrical), £949,000 (£1,131,000).

POWER USED.

The aggregate horse-power used in all industries in Tasmania during 1932-33 was 143,236 (145,733). A deduction must be made from this total owing to the duplication of 56,889 (59,586) horse-power due to the inclusion of electric power generated by other forces. The net horse-power used was, therefore, 86,347 (86,147).

(*a*) Including Special Grant (Commonwealth) and Expenditure therefrom.

ACCUMULATED DEFICIENCY TO 30TH JUNE, 1933.

The figures in the above table do not provide a complete record of the Accumulated Deficiency in the State's finances, owing to the practice of debiting Suspense Accounts with Revenue Charges. The following additional amounts should be added to the deficiency shown above to arrive at the aggregate position:—

Accumulated Deficiency at 30th June, 1933.

	£
Deficit, as shown in above table	1,297,794
Losses on Returned Soldier Settlement	681,307
Loss on realisation of State Ships	61,774
Losses on Marrawah Tram	83,134
Hydro-Electric Depreciation Deficiency	47,211
Railway Renewals Deficiency	78,179
Other	61,380
Total	2,310,779
Less Sinking Funds	30,718
Net Total	£2,280,061

NOTE.—The net total above excludes suspended sinking funds and the non-provision of depreciation for replacement of certain capital assets of the State.

Customs (*b*)	305,918	290,708	312,858	359,989	173,013	223,487	248,458
Excise (*b*)	94,459	109,930	113,760	127,086	119,809	109,595	106,348
Total	566,109	570,531	605,225	673,573	605,600	741,627	689,920
Customs and Excise (*c*)	1,243,000	1,164,000	1,146,000	1,167,000	795,000	803,000	934,000
Sales Tax (*d*)	...	...	...	...	98,000	238,000	265,000
Estimated Grand Total (*e*)	1,408,732	1,333,893	1,324,607	1,353,498	1,133,974	1,284,493	1,370,000

(*a*) Collections at the Central Office (which for the whole of the Commonwealth amount to approximately one-third of the total) are not included.

(*b*) Actual collections in Tasmania. The amount of duty collected in the other States of the Commonwealth on goods transhipped to Tasmania is not included.

(*c*) Figures based on the assumption that the Customs and Excise Revenue per head in Tasmania, from 1913 onwards, bore the same proportion to the Customs and Excise Revenue per head for the Commonwealth that it did on the average for the nine years 1901 to 1909, for which years only full information is available. (The average per head, 1901 to 1909, in Tasmania was approximately 82% of the average per head for the Commonwealth.)

(*d*) Assuming similar proportion of Collections per capita as for Customs and Excise.

(*e*) Excluding Central Office Collections of Income, &c., Taxes.

(*a*) Including periodic payments in reduction of principal.

(*b*) Much of the debt of Local Government Bodies is in the form of Instalment Debentures, which means a fixed periodic payment on account of interest and principal. For each debt, therefore, the payment on account of interest decreases and the payments on account of principal increases from year to year. These figures indicate the liability as at 30/6/33.

FRIENDLY SOCIETIES.

REPORT OF THE STATISTICIAN FOR THE YEAR 1932.

Hobart, 26th September, 1933.

SIR,

In accordance with Section 10 of the Friendly Societies Act, 1888, I have the honour to make the following report with respect to the year 1932.

(Note.—Figures in parentheses refer to the previous year—1931.)

Returns and Information.

District secretaries and secretaries of the larger lodges, together with all other persons who applied for them, were supplied with copies of the printed report and tables for 1931, showing the strength, progress, and financial position of the societies.

A special effort was made to obtain the annual returns this year without the customary delay, and, as a result, late returns were furnished by secretaries in only a few instances. It has been possible therefore to complete this report and the general statistics appended much earlier than usual in recent years.

Owing to the number of serious irregularities evident in the returns each year, it has been found necessary, unfortunately, to pay increasing attention to the returns submitted by secretaries. In the returns relating to the year 1932, violations of the Friendly Societies Act, in connection with the allocation of funds, were particularly frequent. It is a common practice among certain lodges for a portion of contributions and interest, properly belonging to sick and funeral funds, to be credited to their management fund in order to meet administration expenses, but the frequency of offences of this nature during 1932, and the serious amounts involved, give an indication that the financial position of societies generally had become difficult. In the interests of members, the sick and funeral funds must be kept intact, and, accordingly, each return submitted was checked as far as possible to ensure that the apportioning of funds was correct, and also that in other respects the return was in strict conformity with the Friendly Societies Act, and the registered rules of the society. Where an irregularity was noted, steps were taken to have satisfactory adjustments made and to ensure as far as possible that a recurrence of the offence will be avoided in future.

The auditing of the annual returns was again unsatisfactory. Attention has been drawn in previous reports to this unfavourable feature of friendly society administration, and the experience of the accounts for 1932 confirmed the opinion expressed that the present system of honorary auditing is inadequate. In a few societies auditing of lodge accounts is performed by the district secretaries with satisfactory results, a practice that could be extended with great advantages, but generally throughout societies in Tasmania the experience is that the auditors selected are not competent to conduct a strict audit. It is apparent that under these conditions it is impossible to maintain a proper supervision of friendly society funds.

Societies.

At the end of the year 1932 there were 19 (20) distinct registered friendly societies carrying on business in Tasmania. Of these 13 (13) were ordinary friendly societies and 6 (7) were special societies, the latter being restricted in membership to the staff of a particular firm or institution, or the residents of one locality. Members of this special group numbered 2178 (2242), comprising 8·6 (8·6) per cent. of the total membership of all societies. In ordinary societies there were 152 (156) branches for male members, showing a decrease of four from the number in 1931, while female branches and juvenile branches, as in the previous year, numbered 22 and 11 respectively.

Membership.

A further loss of membership was experienced by friendly societies during the year 1932, the total number of benefit members at the end of the year falling to 25,352, or 790 less than at the end of 1931. This level is low compared with a yearly average of 26,098 over the five years 1927-31. Of the total loss in membership of 790 in 1932, special societies and juvenile branches comprised together only 89, so that the number of adult members of ordinary societies decreased by over 700. The total benefit membership at the end of 1932 consisted of 23,121 (23,846) male adults, 1697 (1737) female adults, and 534 (559) juveniles.

In the interests of societies, attention is again drawn to the serious increase in the average age of members. By the end of 1932 the average age for male members rose to 42·4, the unfavourable growth being shown by comparison with corresponding averages of 41·6 for 1931, 40·5 for 1930, 40·3 in 1929, and 37·0 in 1920. In computing this average age no account has been taken of special societies, as the larger societies of this

class do not specify the ages of their members. These members are drawn largely from the younger age groups, and their inclusion would lower the averages given above to a certain extent. The following table, which relates to male members of ordinary societies, the major section of the aggregate membership, shows clearly the changed position with regard to the ages of members since the year 1920:—

Age Groups.	1920.		1931.		1932.		1932 Members Distributed on Basis of 1920.
	No.	Per Cent.	No.	Per Cent.	No.	Per Cent.	
16-19 years	1,605	7·79	1,041	4·85	861	4·12	1627
20-29 years	5,445	26·42	4,717	21·97	4,408	21·11	5518
30-49 years	9,859	47·85	9,446	44·00	9,167	43·90	9991
50 years and over	3,696	17·94	6,266	29·18	6,446	30·87	3746
Total members whose ages were specified	20,605	100·00	21,470	100·00	20,882	100·00	20,882
Average age of members whose ages were specified	37·0 years		41·6 years		42·4 years		37·0 years

It is evident from the above table that societies have failed to maintain the age composition of 1920 primarily owing to lack of initiation in the younger age groups. Members under 20 years of age formed 7·8 per cent. of the total in that year, but by the end of 1931 this percentage had fallen to 4·8 per cent., while a further drop occurred in 1932 to 4·1 per cent., or only a little over one half of the corresponding percentage in 1920. This feature has doubtless been considered by the management of lodges, for it is one that deserves their very serious attention. The abnormally small number of initiations during recent years is probably only a temporary feature, but, as the welfare of friendly societies depends upon an adequate recruitment of young members, every effort should be made to restore the number of initiations to the levels ruling before the present financial depression. On the other hand, the number of members in the oldest age group, 50 years or over, has been steadily increasing, and in 1932 comprised 30·9 per cent. of all members, compared with 29·2 per cent. in 1931, and 17·9 per cent. in 1920.

In the ages of female members a similiar trend has been followed. At the end of the year 1931 the average age in this group was 30·9, which was increased during 1932 to 31·7 years.

As in the previous year, a greater percentage than usual of members during 1932 were unable to pay their contributions in full. For all lodges at the end of 1932, there 1982 (1914) members in arrear, comprising 7·8 per cent. of all members, compared with 7·3 per cent. in 1931, 6·0 per cent. in 1930, and 4·9 per cent. in 1929. On account of these arrears of contributions, 1131 (1150) members of male ordinary societies were removed from the benefit membership list, representing 59·1 (58·0) per thousand financial members, while corresponding departures from female branches numbered 195 (175), or 127·5 (109·5) per thousand financial members.

Sickness and Mortality.

Sickness experience was heavy during the year 1932. Although the actual number of cases in male lodges decreased to 4994, compared with 5241 in 1931, the total duration was greater, amounting to 339,610 (327,730) days. In female lodges, sickness in respect of both cases and duration was lighter than in the previous year, the number of cases being 300 (348), and the total duration, 18,990 (19,137) days. The average length of each case of sickness in 1932 was 68·0 (62·5) days for males, and 63·3 (55·0) days for females. The average length of sickness per case has grown very disquietingly, and is now 50 per cent. greater than the experience of 1921. Much of the increase is probably due to the growth in the average age of members; nevertheless, the matter is one that merits the close attention of the management.

The total number of deaths among members of friendly societies during 1932 was 275 (263), of whom 269 (256) were males, and 6 (7) females. The corresponding death rates per thousand financial members were 12·6 (11·6) and 3·9 (4·4) for males and females respectively.

There were 120 deaths of registered wives, the same in number as in 1931, and payments in funeral donations on this account amounted to £1623 (£1621).

Funds.

The total for net receipts fell considerably during the year 1932, amounting to only £116,391 (£123,262), or £6871 less than net receipts for the previous year. A proportionate fall was not recorded in net expenditure, which only dropped to £111,497

(£114,158), with the result that the lowest surplus £4894 (£9104) in recent years was experienced. Expressing the net surplus as a percentage of net expenditure, the surplus declined from 8·0 per cent in 1931 to 4·4 per cent. in 1932, both of which are low compared with the average of 15·3 over the five years 1926-30.

The total funds of friendly societies had accumulated to £436,218 (£431,153) by the end of 1932, representing a growth of approximately 1 per cent. during the year. Of this sum, £426,582 was represented by various investments returning interest, and a small amount, £9636, was held uninvested. This total for accumulated funds was equivalent to £18 13s. 4d. (£17 15s. 11d.) per financial member, which is the highest rate yet reached in the accumulation of funds.

Receipts.

Of the actual items in the total net receipts, £116,391 (£123,262), contributions and levies comprised £84,750 (£87,807), representing an average payment of £3 12s. 6d. (£3 12s. 6d.) per financial member, interest earnings amounted to £18,393 (£22,121), or 15s. 9d. (18s. 3d.) per financial member, while other items totalled £13,248 (£13,334), including £292 (£283) in entrance fees.

Interest earnings were reduced considerably during the year 1932 as the result of the legal enactments affecting rates of interest, and will probably remain at a low level for some years. The average rate of interest earned on the total funds of societies during 1932 was 4·3, compared with the rate of 5·1 obtained in the preceding year.

Expenditure.

In the total of £111,497 (£114,158) for net expenditure, £28,316 (£29,752) was paid for medical attendance and medicine, equivalent to £1 4s. 3d. (£1 4s. 7d.) per financial member. Sick pay and funeral donations were relatively higher during 1932 than in the previous year, amounting respectively to £34,103 (£34,596) and £22,168 (£20,058), or, per financial member, £1 9s. 2d. (£1 8s. 6d.) and 19s. (16s. 7d.). Administration expenses were reduced slightly to £18,477 (£19,353), or 15s. 10d. (16s.) per financial member.

The percentage distribution of net expenditure among the various items was as follows:—Medical attendance and medicine, 25 (26) per cent.; sick pay, 31 (30); funeral donations, 20 (18); administration 17 (17); miscellaneous, 7 (9).

Conclusion.

In the report for 1931, special reference was made to the urgency of a further valuation of funds, and an amendment of the Friendly Societies Act.

The experience of 1932, as set out in the foregoing report and the subsequent statistics, has, in my opinion, strengthened the need for action in the directions indicated, and, accordingly, I again desire to recommend their very favourable consideration.

H. J. EXLEY,
Government Statistician, and Deputy-Commonwealth Statistician.

The Hon. the Attorney-General,
Hobart.

NOTE.—In years 1915 and 1916 the receipts include moneys which were found to be Trust Funds which should have appeared as transfers. The capital shows these funds (some £6000 in 1915 and £3725 in 1916) in duplicate, in addition to details shown in these two years respectively.

* Deducting cross entries, £1190 in 1905, £388 in 1906, £505 in 1907, £706 in 1908, £391 in 1909, £430 in 1910, £1334 in 1911, £706 in 1912, £1899 in 1913, and £1192 in 1914. In 1915 and onward for cross entries, see annual detail.

† Juvenile Lodges not included.

§ Capital of Lodges closed during year 1914, £45.

‖ Excluding value of Dispensary Stock on hand in 1913, £685; in 1914, £1588; in 1915, £1491; in 1916, £1744; in 1917, £1981; in 1918, £2403; in 1919, £2871; in 1920, £3060; in 1921, £3558; in 1922, £2986; in 1923, £3262; in 1924, £3526; in 1925, £3556; in 1926, £3750; in 1927, £3843; in 1928, £4287; in 1929, £4184; in 1930, £4529; in 1931, £4355; in 1932, £4184

‡ In 1920 and onward "Consolidated Sick Funds" and "Juvenile Funeral Funds," &c., which appear in earlier years in "Other Funds," are included in this column.
